SUMMARY

Software Engineer focused on scalable full-stack systems and AI-powered applications. Strong foundation in system design, API architecture, and performance optimization with demonstrated impact in production environments.

EXPERIENCE

Full Stack Engineer (Intern)

Evu (Unhire)

Feb 2026 – Present

Remote – New York, USA

- Integrated **Stripe Connect** and **Escrow** services to facilitate secure, milestone-based payment processing and multi-currency fund protection.
- Engineered high-deliverability email infrastructure using **Resend** and custom **SMTP servers**, automating event-driven notifications and boosting task response by **30%**.
- Designed and implemented workflow automation systems reducing manual coordination overhead by **35%**.
- Architected draft submission and review pipelines, cutting feedback turnaround time by **40%**.
- Contributed to production deployments with zero critical regressions across weekly release cycles.

EDUCATION

University of Turbat

Bachelor of Computer Science, CGPA: 3.40

Balochistan, Pakistan

Expected Dec 2027

PROJECTS

Cherág – AI Study Platform

Full-Stack, Multi-Model AI System

2024 – Present

- Engineered multi-model AI architecture integrating Gemini, OpenRouter, and fallback routing for high availability.
- Built document-to-knowledge pipeline generating flashcards, quizzes, and summaries from unstructured inputs.
- Implemented secure authentication and scalable backend using Supabase and REST APIs.

AI-Powered Home Automation

Python, Embedded Systems

2024

- Developed real-time AI-controlled home automation integrating voice recognition and hardware control via Arduino/ESP32.
- Implemented multithreaded UI handling concurrent serial communication and real-time sensor streaming.

Offline-First POS System

React, TypeScript, Supabase

2024

- Architected local-first data layer with IndexedDB sync, ensuring uninterrupted operation without network connectivity.
- Optimized search and indexing algorithms achieving **90% performance improvement** in local data retrieval.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Frontend: React, Next.js, Tailwind CSS

Backend: FastAPI, Node.js, Flask, REST APIs, SMTP/Resend

Databases/Tools: Supabase, Stripe, PostgreSQL, IndexedDB, MongoDB, Git

Concepts: System Design, Fintech Integration, Event-Driven Systems, Performance Optimization

CERTIFICATIONS

Google Cybersecurity Certificate | NVIDIA Networking Certificate
